

# eFlex Single Traffic Barrier+

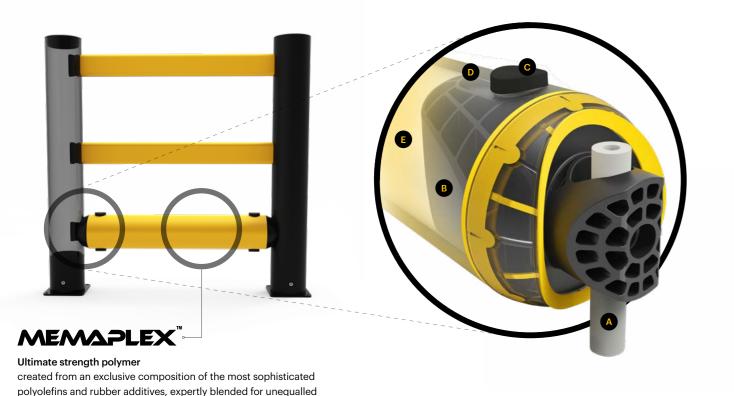

Designed to protect people from injury, and safeguard buildings and equipment from damage both inside and out.

The mid-strength, dual-function barrier isolates vehicles whilst also guiding pedestrians. The traffic rail provides physical resistance to impacts. The addition of an ergonomic handrail increases the height to segregate pedestrians and prevent falls.

Ideal for mid-traffic areas where people and vehicles mix, and for build base specifications.

### **Energy Absorption System**

A patented 3-phase system that activates sequentially for unparalleled energy absorption.

- 1 Memaplex™ rail flexes to absorb impact, initiating the rail pin to slide forward and transfer load energy to the compression pocket.
- 2 Compression of the pocket continues to disperse energy as the coupling rotates around the post pin to activate further absorption.
- 3 At peak energy, the coupling twists further, engaging the post pin and instigating torsion of the post to dispel remaining forces.

## Suitability

counterbalance heavy duty FLT

Electric high reach truck

Horitzontal Order Picker

#### Revolutionary 3-Layered Material

- strengthening core
- Central impact absorption zone
- Outer UV stabilised

## **Application**

Protects structures

counterbalance

FLT

Protects Pedestrians Unrivalled recovery through a unique built-in memory that allows the barrier to flex, cushion and reform repeatedly upon impact, saving vast amounts in barrier and vehicle repairs.

Huge return on investment from incident prevention and downtime avoidance as barriers, vehicles, floors and equipment do not need replacing or repair.

#### Features and benefits

Multi-directional system ensures a streamlined fit into any operation and the removal of hard angles.

Self coloured and UV stabilised for continued visibility and long lasting aesthetics with no repainting.

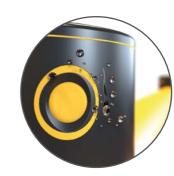

Ultra-low maintenance material is chemical and water resistant, non-corrosive, non-scratch and self coloured so no repainting, rusting, flaking or corrosion.

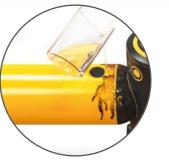

No floor damage 80% of impact force is absorbed, transferring just 20% to the floor.

Exclusive modularity allows rails and posts to be replaced in-situ without removing adjacent barrier sections.

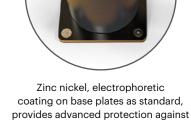

Food safe, wipe-clean, water resistant surface.

Hygiene seals remove ingress points.

Ergonomic design with no

sharp edges.

corrosion damage.

Environmentally friendly and 100% recyclable.

strength and flexibility.

**Advanced Engineering Molecular** 

reorientation during manufacturing creates a unique built-in

memory that enables the barrier to fully recover following impacts.

## **Technical Information**

<b>Post</b>	Opt	ions

#### **Rail Options**

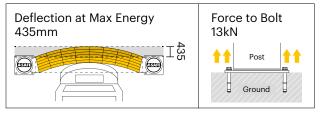

Standard Yellow	Standard Black
RAL 1007*	RAL 9005*
PANTONE 7548*	PANTONE Black

#### Colour Combinations

\*Please note that the RAL and PANTONE colours listed are the closest match to standard A-SAFE colours, but may not be exact matches of the actual product colour and should be used for guidance only.

Impact Test	Impact Angle on 2000mm Post Centres			
	90°	67.5°	45°	22.5°
Mid Rail Max Energy (Joules)	10,200	11,950	20,400	69,650

End Post Max Energy (Joules) - 90°	3,600
Mid Post Max Energy (Joules) - 90°	3,600

Material Properties	MEMAPLEX"
Temperature Range	-10°C to 50°C
Ignition Temperature	370°C to 390°C
Flash Point	350°C to 370°C
Toxicity	Not Hazardous
Chemical Resistance	Excellent - ISO/TR 10358
Weathering Stability (Grey Scale)	5/5*
Light Stability (Blue Wool Scale)	7/8**
Static Rating (Surface Resistivity)	1015 - 1016 Ω
Hygiene Seals	No

<sup>\*</sup> Weathering scale 1 is very poor and 5 is excellent

<sup>\*\*</sup> Light stability scale 1 is very poor and 8 is excellent
