

iFlex Single Traffic Barrier+

Designed to protect people from injury, and safeguard buildings and equipment from damage both inside and out.

The high-strength, dual-function barrier isolates vehicles whilst also guiding pedestrians. The traffic rail provides heavy-duty resistance to impacts. The addition of an ergonomic handrail increases the height to segregate pedestrians and prevent falls.

Ideal for busy environments and high traffic areas where people and vehicles mix.

Tested to the global benchmark

in barrier safety

Code of Practice for

Workplace Safety Barriers

MEMAPLEX

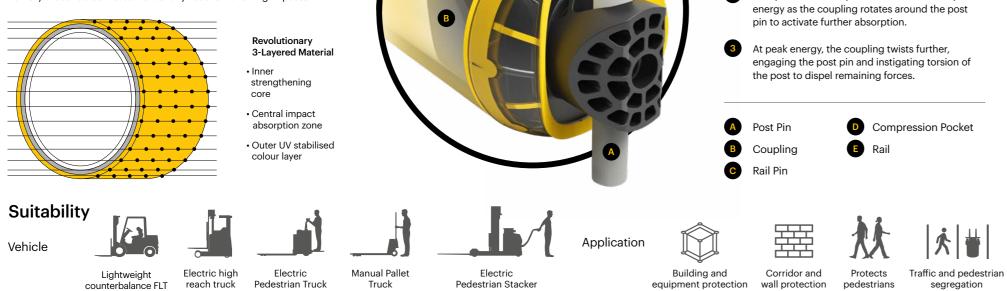

Ultimate strength polymer

 \mathbf{Q}

created from an exclusive composition of the most sophisticated polyolefins and rubber additives, expertly blended for unequalled strength and flexibility.

Advanced Engineering Molecular

reorientation during manufacturing creates a unique built-in memory that enables the barrier to fully recover following impacts.

Energy Absorption System

A patented 3-phase system that activates sequentially for unparalleled energy absorption.

Memaplex[™] rail flexes to absorb impact, initiating 1 the rail pin to slide forward and transfer load energy to the compression pocket.

Compression of the pocket continues to disperse

Truck

Unrivalled recovery through a unique built-in memory that allows the barrier to flex, cushion and reform repeatedly upon impact, saving vast amounts in barrier and vehicle repairs.

Huge return on investment from incident prevention and downtime avoidance as barriers, vehicles, floors and equipment do not need replacing or repair.

Features and benefits

Multi-directional system ensures a streamlined fit into any operation and the removal of hard angles.

Self coloured and UV stabilised for continued visibility and long lasting aesthetics with no repainting.

Zinc nickel, electrophoretic coating on base plates as standard, provides advanced protection against corrosion damage.

Exclusive modularity allows rails and posts to be replaced in-situ without removing adjacent barrier sections.

Hygiene seals remove ingress points.

Ergonomic design with no sharp edges.

Ultra-low maintenance material is chemical and water resistant, non-corrosive, non-scratch and self coloured so no repainting, rusting, flaking or corrosion.

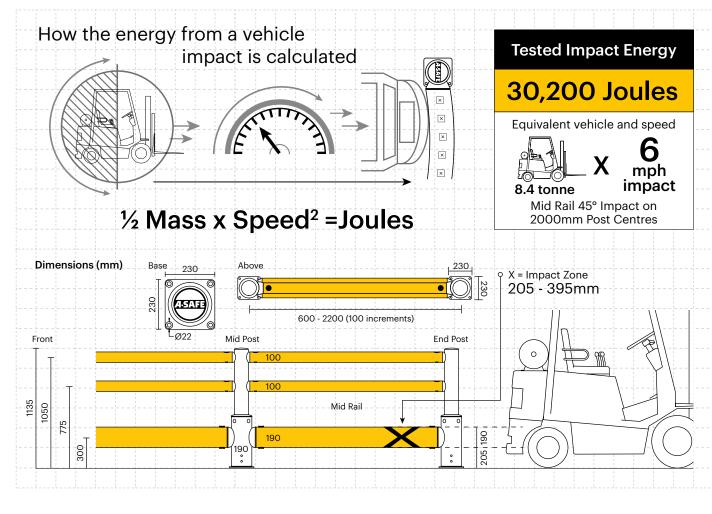

Environmentally friendly and 100% recyclable.

No floor damage 80% of impact force is absorbed, transferring just 20% to the floor.

resistant surface.

Material Properties	MEMAPLEX				
Temperature Range	-10°C to 50°C				
Ignition Temperature	370°C to 390°C				
Flash Point	350°C to 370°C				
Toxicity	Not Hazardous				
Chemical Resistance	Excellent - ISO/TR 10358				
Weathering Stability (Grey Scale)	5/5*				
Light Stability (Blue Wool Scale)	7/8**				
Static Rating (Surface Resistivity)	1015 - 1016 Ω				
Hygiene Seals	Yes				

* Weathering scale 1 is very poor and 5 is excellent ** Light stability scale 1 is very poor and 8 is excellent
